

PacketStorm Communications Releases Second GUI For Their Award Winning IP Network Emulators

Eatontown, New Jersey (December 10, 2004)

PacketStorm Communications® announced today the release of a second graphical user interface for their award winning line of IP Network Emulators. The new GUI is called Basic Mode and is designed for novice users and/or simpler network models.

“Customers have requested the full functionality of our standard GUI and in addition a method to simplify the network model creation for beginners” said Bill Luthy, PacketStorm’s Director of Sales. “Again PacketStorm’s engineering team has exceeded our customers expectations by combining the best of both worlds: total user flexibility with ease of use. It’s abundance of features has made PacketStorm the market leader of network emulators.”

The Basic Mode configurations files are compatible with the Standard Mode configuration files. In fact, either configuration file is supported by both modes.

The Basic Mode GUI is already available for new systems and can be added to any of the systems currently installed in the field. Pricing is available directly from PacketStorm or through their worldwide Distribution Channel.
